PROJECTS

➤ Ez-GST: A GST Calculator

In a Hackathon of Samsung Innovation Campus, I with the team of 4 others made a GST Calculator. That GST Calculator have the ability to generate the GST applied on any product by Scanning the QR Code given on it. It was also for commercial use like a seller can use that calculator to generate a Bill of a product with GST of that particular kind of products by filling some requirements like Category of the product.

➤ A Vehicle Speed Detector

I've built a Vehicle speed Detector using Arduino Nano. That have the ability to measure the speed of a moving car using IR sensors and show it to LED. It also has the ability to warn if any Vehicle exceeds the limit.
